Introduction .....	1

## Part 1: Structural Interpretation Methods

by John H. Shaw, Christopher D. Connors, and John Suppe

A) Defining Structural Geometry	
1) Defining fold shape and dip domains .....	2
2) Recognizing thrust and reverse faults .....	8
3) Recognizing growth strata .....	11
B) Classes of Fault-related Folds	
1) Fault-bend folds .....	15
2) Fault-propagation folds .....	26
3) Detachment folds .....	35
4) Shear fault-bend folds .....	39
5) Imbricate fault-bend folds .....	47
6) Structural wedges .....	52
7) Interference structures .....	57

## Part 2: Case Studies

### Fault-Bend Folding

1) Pitas Point anticline, California, U.S.A.: by John H. Shaw, Stephen C. Hook, and John Suppe .....	60
2) Toldado anticline, Upper Magdalena, Colombia: by Alexis Rosero and Juan Carlos Ramon .....	63
3) Sequatchie anticline, Tennessee, U.S.A.: A small displacement fault-bend fold: by Shankar Mitra .....	66
4) El Furrial Field cross section, Eastern Basin, Venezuela: by Enrique Novoa, László Benkovics, Claudia Fintina, and Javier De Mena .....	69
5) Rosario Field, Maracaibo Basin, Venezuela: by Ted Apotria and M. Scott Wilkerson	71
6) Medina anticline, Eastern Cordillera, Colombia: by Mark G. Rowan and Roberto Linares .....	77
7) Three-D interpretation of the El Furrial Trend, Eastern Venezuela Basin, Venezuela: by Miguel Morales, Enrique Hung, and Richard Bischke .....	83
8) Shear fault-bend fold, deepwater Niger Delta: by Freddy Corredor, John H. Shaw, and John Suppe .....	87

### Fault-Propagation Folds

9) Basil anticline, Northern Apennines, Italy: by Fabrizio Storti, Stefano Tavani, Saverio Merlini, Alessandro Mosconi, and Francesco Salvini .....	93
10) Salt weld detached fault-propagation folds: by Frank Bilotti, Timothy Brickner, Thomas Elliott, Chip Morgan, Richard Redhead, Yusri .....	96
11) Structural inversion along the Sakala Fault, East Java Sea, Indonesia: by Shankar Mitra .....	100

### Detachment Folds

12) Detachment fold, deepwater Niger Delta: by Frank Bilotti, John H. Shaw, Ronald M. Cupich, and Roisin M. Lakings .....	103
13) Mississippi Fan Fold Belt, Gulf of Mexico: by Mark G. Rowan and Frank J. Peel .....	105
14) Yakeng detachment fold, South Tianshan, China: by Aurélia Hubert-Ferrari, John	

Suppe, Xin Wang, and Chengzao Jia .....	110
<b>Imbricate, Wedge, and Interference Structures</b>	
15) Odd geologic structures of southern Oklahoma revisited, Oklahoma, U.S.A.: by Paul Genovese .....	114
16) Fault-bend folds in the Southern Caribbean Ranges, San Carlos, Venezuela: by P. E. Kraemer and J. Silvestro .....	120
17) Quirk Creek anticline, Alberta, Canada: by Steve Lingrey .....	122
18) Imbricate fault-related folding, South Caribbean Basin, Colombia: by Freddy Corredor, Tomas Villamil, and John H. Shaw .....	126
19) Oligocene fold belt, western Gulf of Mexico, U.S.A.: by Thomas W. Bjerstedt ..	131
20) Edge-Sigsbee folds, Gulf of Mexico, U.S.A.: by Robert J. Alexander, Thomas W. Bjerstedt, and Sharon L. Moate .....	133
21) Fault-related folding in reactivated offshore basins, California: by Carlos Rivero and John H. Shaw .....	135
22) Coalinga anticline, San Joaquin basin, California, U.S.A.: by Chris Guzofski and John H. Shaw .....	138
23) Wedge structure, Nias Basin, Sumatra, Indonesia: by Peter A. Brennan and John H. Shaw .....	141
24) Interference structure, Gulf of Mexico, U.S.A.: by Rion H. Camerlo, Thomas W. Bjerstedt, and Edward F. Benson .....	144
25) End members of gravitational fold and thrust belts (GTFBs) in the deep waters of Brazil: by Pedro Victor Zalán .....	147
